GAME PROPOSAL · CMP406 GAMETECH · FALL 2026

Shooter Party

WORKING TITLE October 2026

A LAN party game for 2–4 players. Shoot, push and blast your friends through short mini-games; one shared scoreboard decides the winner.

01 · THE GAME

Game description

Every round is a new mini-game, and placement turns into points.

Shooter Party is a party game for 2–4 friends in one room, each at their own PC. One player hosts and the others join over the local network. Everyone controls a small shooting cube. The mini-games change what a shot does: one pushes, one damages, one lifts you with a blast. After the last mini-game, the player with the most points wins.

1 Lobby

Host sets the session rules. Others join over LAN.

2 Pick

The playlist picks the next mini-game. Everyone loads the same arena.

3 Play

Some mini-games have their own rounds inside.

4 Place

Final placement becomes points.

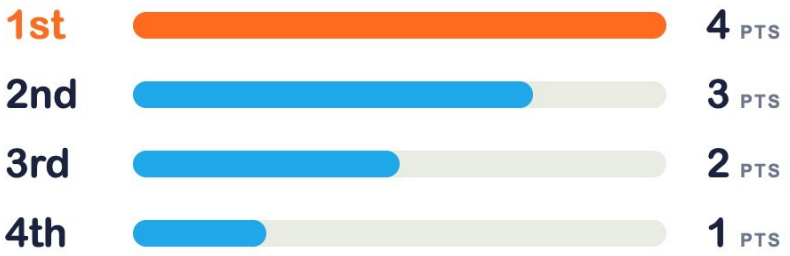

5 Standings

Scoreboard updates. Repeat until the session ends.

SESSION SETTINGS

END CONDITION	After a set number of mini-games, or when a player reaches a target score.
PLAYLIST	Random or custom. Unwanted mini-games can be excluded, and one mini-game can be played many times.
INNER ROUNDS	A mini-game can run its own rounds, like Hole Grab losing one hole each round.

PLACEMENT POINTS · PROPOSED

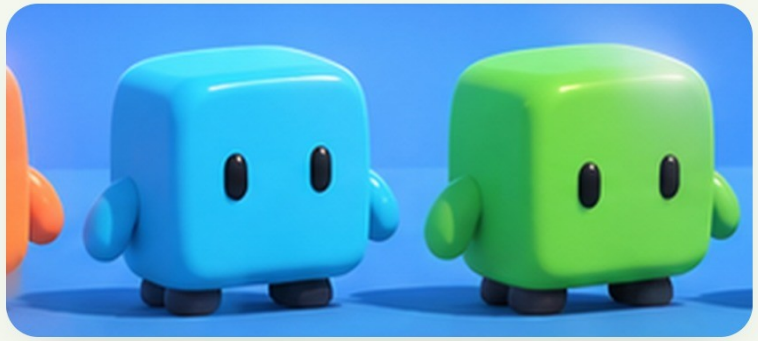

Only points carry over between mini-games.

02 · GAMEPLAY MECHANICS

Core mechanics

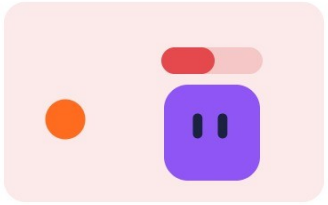

One shooting cube. **Every mini-game changes what a shot does.**

The player. A small character with a barrel that fires real projectiles: physics objects, not instant hits. It does not have to be a cube, but its proportions should stay close to 1:1:1. Four colours: orange, cyan, lime, purple.

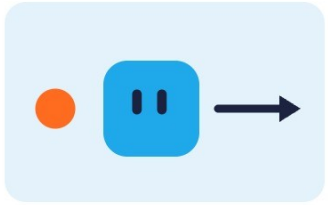

Concept render, AI-generated. Not gameplay.

ONE TRIGGER, THREE EFFECTS

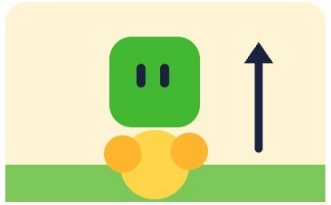

Damage

The shot lowers the target's health.

Knockback

The target is pushed away from the direction the shot came from.

Blast

The shot explodes. Fired at the ground, it lifts the shooter up.

MOVEMENT

WASD to move. Jumping is allowed in some mini-games and not in others.

CAMERA

A third-person shooter camera by default. A mini-game can change it, like the 2.5D side view in Blast Parkour.

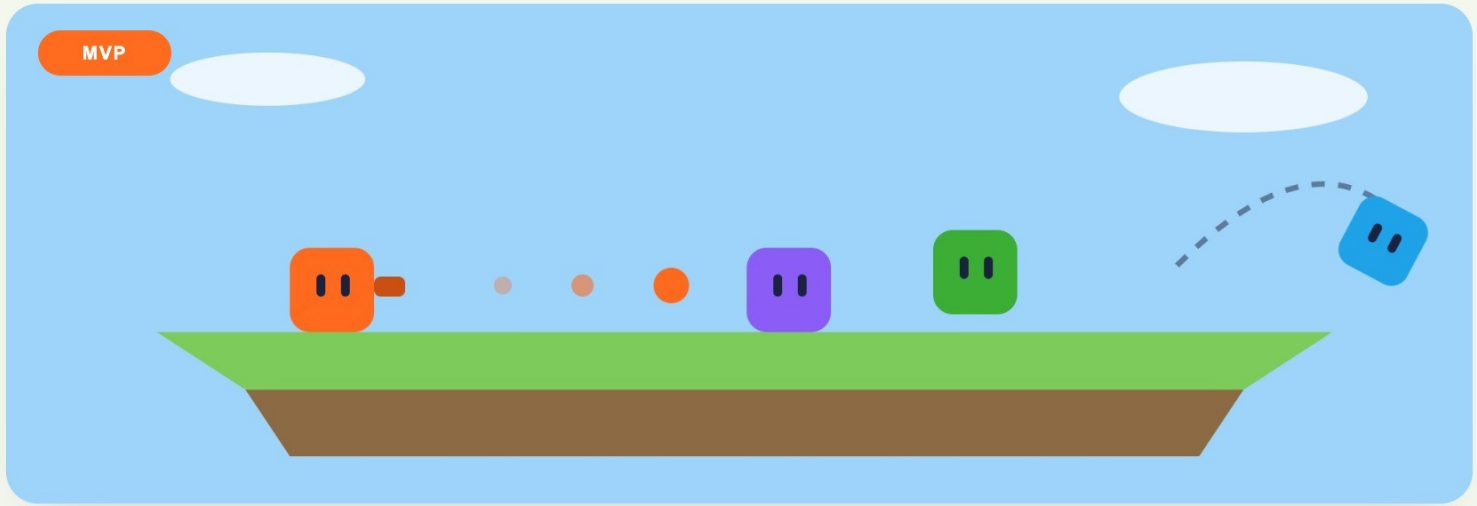

MECHANIC IDEAS WE WANT TO TRY

Shoot the ground to jump. Steer with recoil: on ice, firing forward pushes you back.

MINI-GAME 01 · WORKING NAME

Knockback Arena

Shoot the others off a flat floor. Every hit makes them lighter.

Illustration, not gameplay. Arena theme and size are not set.

SHOOTING

Free, with a fire-rate limit. Shots are real thrown objects and have no effect on the shooter.

GETTING HIT

A force from the shot's direction, and a drop in mass. Volume stays the same.

MASS, NOT SIZE: THE SAME SHOT, A LONGER FLIGHT

Full mass. A hit pushes a little.

After a few hits. Same size, less mass, a longer push.

Many hits. One more shot sends it off the edge.

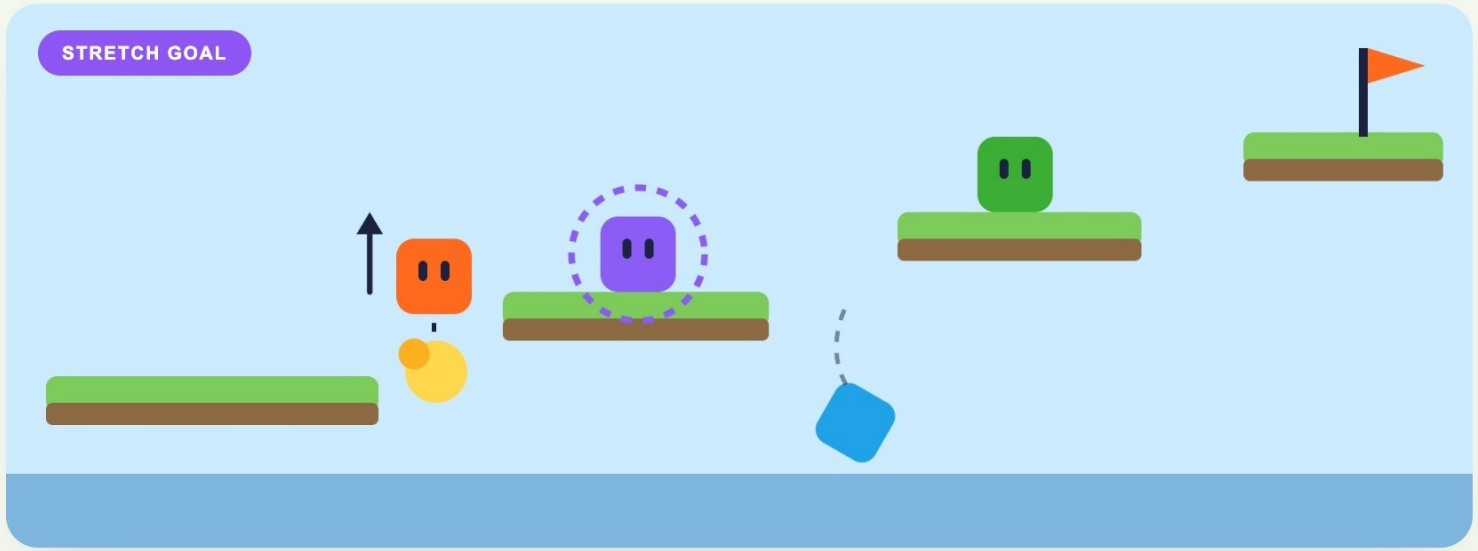

OUT AND PLACEMENT

Falling off means you are out. Proposed: placement by order of elimination, last cube standing wins.

MINI-GAME 02 · WORKING NAME

Blast Parkour

A 2.5D obstacle course: spit, blast and climb while knocking the others into the void.

Illustration, not gameplay. Orange blasts the ground to jump; purple charges a strong shot; cyan has been knocked into the void.

IF HITTING IS TOO EASY

We make shots fall with gravity, so players have to read the arc to land a hit. We decide this in playtests.

2.5D COURSE

Built side-on, so there is nowhere to hide. Everyone is always in someone's line of fire.

CHARGED BLAST

Hold to fire a strong explosion. While charging you cannot move, so you are open to attack.

BLAST TO CLIMB

A shot at the ground lifts you up. The same blast can push a nearby rival off a ledge.

FALL = OUT

Whoever drops below the course is out. Placement rule: to be decided after the first tests.

MINI-GAME 03 · WORKING NAME

Ice Loop

Most checkpoints before the timer runs out wins. The ice does not help.

Concept render, AI-generated. Not gameplay. Ice is the theme of this one mini-game only.

LOOPED TRACK

When the track ends it starts again, and every checkpoint you pass counts +1. The count, not the lap, decides the placement.

PUSH TO WIN

The ice is slippery. Push rivals off it into the water and they restart from their last checkpoint.

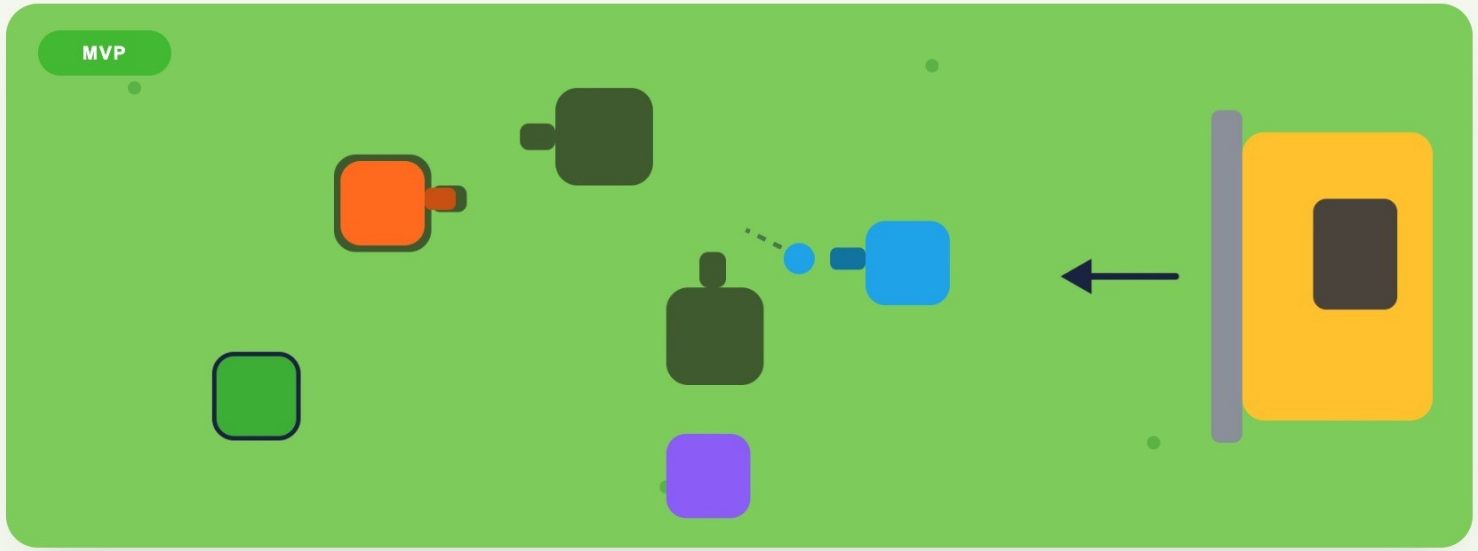

STEER WITH RECOIL (IDEA)

Firing forward while sliding pushes you back, so a shot can also correct your line.

MINI-GAME 04 · WORKING NAME

Hole Grab

Musical chairs with holes. No hole, and the bulldozer gets you.

Illustration, not gameplay. Each hole has the player's shape and a fixed barrel angle. Orange is already in a hole; the bulldozer moves in from the right.

PLAYER-SHAPED HOLES

Holes open in the ground in the player's shape, with the barrel's angle marked. You have to line up to drop in.

SHOOT TO PUSH

Shots push other players away from the holes. A player already inside a hole cannot be pushed out.

ROUNDS INSIDE THE MINI-GAME (4 PLAYERS)

Round 1
4 players, 3 holes. One is crushed.

Round 2
3 players, 2 holes. One is crushed.

Round 3
2 players, 1 hole. The one inside wins.

02 · GAMEPLAY · NOT YET COMMITTED

Ideas in progress

The playlist is built to grow. These are next in line once the core four work.

MORE MINI-GAMES, IN DESIGN

Versus battle

A classic free-for-all shoot-out. Rules: to be designed.

Hard battle

A tougher battle variant. Rules: to be designed.

The Monster

One player is the monster and the rest play against them, with rounds inside. Rules: to be designed.

Owner: Abdurrahim. Each one plugs into the same shared core as the first four.

FUTURE FEATURES

Character types. Concept render, AI-generated.

Character types

Players pick a type with its own strengths. Because mass drives knockback, weight is the natural first stat.

Heavy	MASS	●●●	SPEED	●○○
Balanced	MASS	●●○	SPEED	●●○
Light	MASS	●○○	SPEED	●●●

Example only. Pips are relative; stats are not designed.

Rage meter

A meter that builds up across mini-games. Once it fills over a few rounds, the player can spend it in a later mini-game.

02 · GAMEPLAY & TECH

Technical design

One shared core; every mini-game plugs into it.

MINI-GAMES

Knockback Arena | Blast Parkour | Ice Loop | Hole Grab | Next one

CONTRACT

Setup(players, settings) → Run() → Results() : placement

SHARED GAMEPLAY

Cube controller WASD, jump	**TPS camera** per-game override	**Shot system** effect set per game
Session & playlist end rules, exclusions	**Scoreboard** placement to points	**Lobby & UI** join, settings, HUD

NETWORK

LAN · one player hosts, the others are clients · Unity Netcode (candidate)

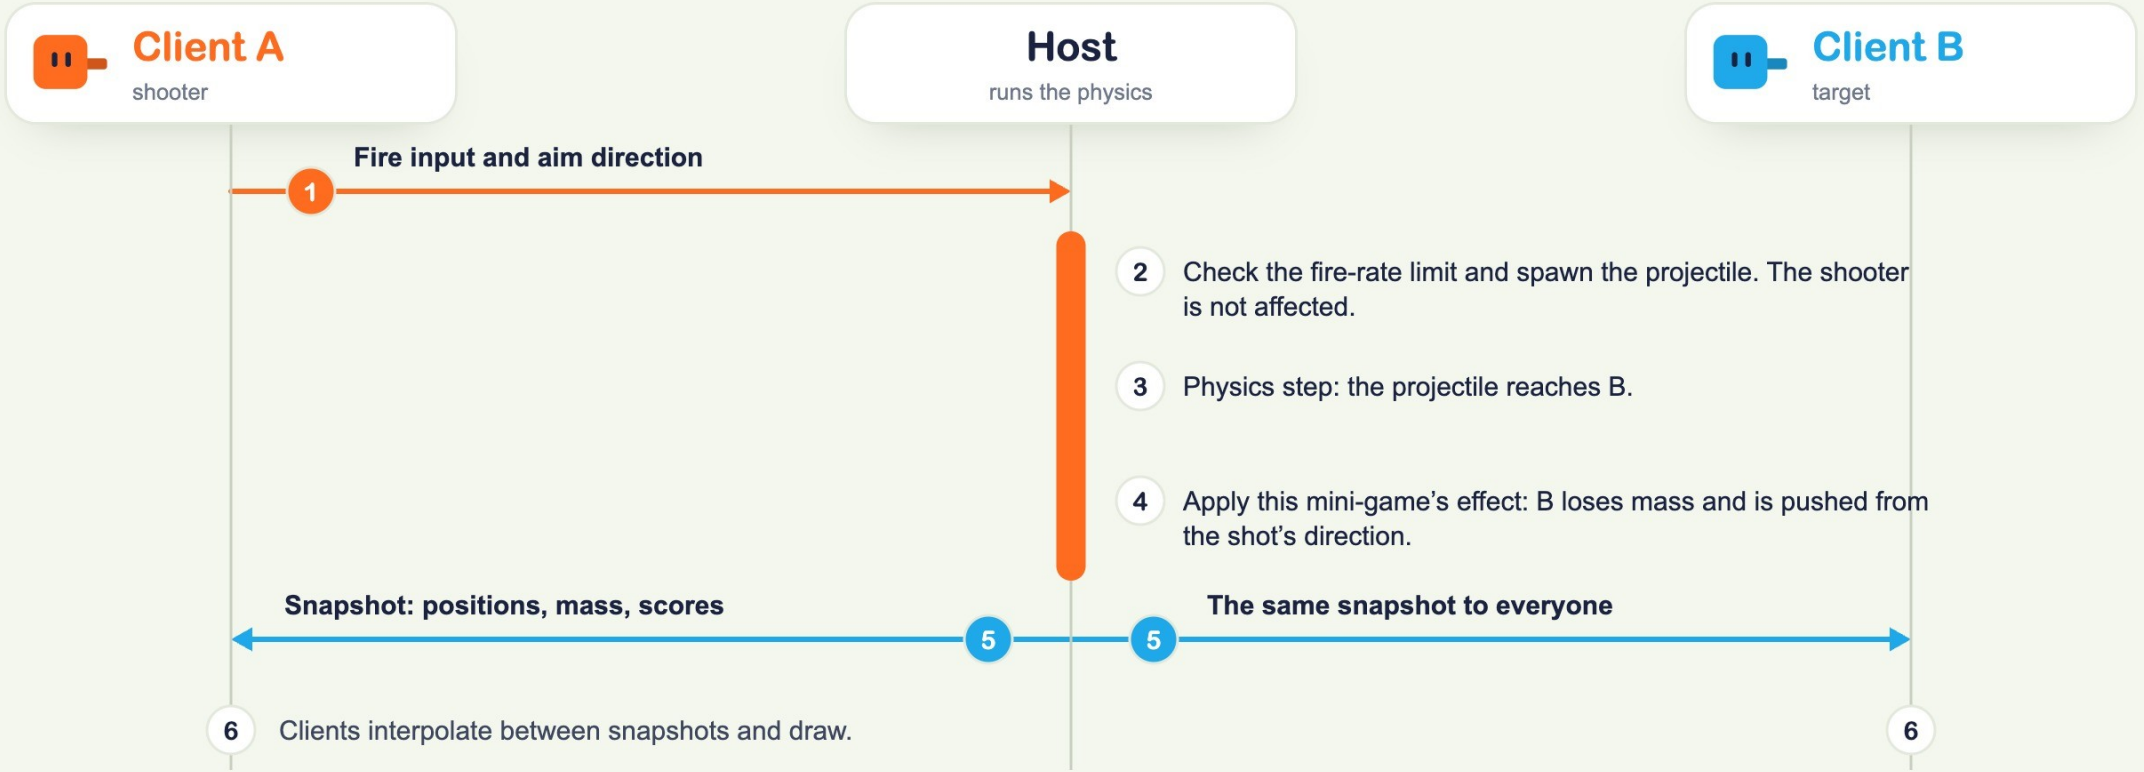

ENGINE

Unity · built-in rigidbody physics

02 · GAMEPLAY & TECH

One shot in Knockback Arena, over the LAN

The host decides; every screen agrees.

Your own movement is predicted locally, so it feels instant. Everything that decides a result runs on the host, so every screen agrees. **Main risk:** keeping physics smooth on clients; LAN latency is low, and we tune the snapshot rate.

03 · MARKET

Market potential & target audience

Social PC play is growing; LAN party games are rare.

Our audience is groups of 2–4 friends who play together in one room, each on their own PC: students, LAN parties and game nights. They want short, readable rounds, a session they can shape themselves, and a game that works without an internet connection.

$43.6B
PC games revenue in 2025, up 12% year on year.
Newzoo [1]

$4.1B
Steam revenue of games with co-op in H1 2025, an all-time high (estimate).
Alinea [2]

70%
of US players aged 8+ play with other people.
ESA 2026 [3]

≈8%
of ~3,490 Steam “Party Game” titles list LAN PvP.
Steam, Oct 2026 [4]

STEAM “PARTY GAME” TITLES BY MULTIPLAYER TAG

Steam store search, 17 Oct 2026 [4]. Tags are user-applied.

RISK, STATED PLAINLY

An estimated 65.9% of 2025 Steam releases earned under $1,000 [5], while 5,863 games passed $100K in 2025 (Valve) [6]. **LAN is our differentiator, not a demand driver.**

03 · MARKET

Competitors

Five games we are measured against.

Party Animals

Recreate Games · 2023

MECHANIC

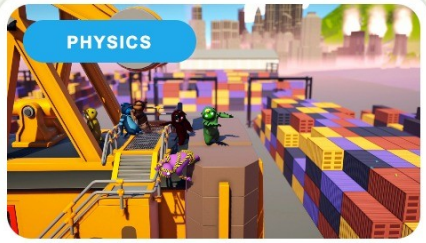

Physics brawling: grab, punch, throw rivals out.

MULTIPLAYER

Online and same-screen. No LAN listed.

FINANCIALS

Launch peak 104,174 players. Owner est. 2.5M–6.0M.

Gang Beasts

Boneloaf · 2017

MECHANIC

Ragdoll brawling into stage hazards.

MULTIPLAYER

Same-screen and online. No LAN listed.

FINANCIALS

85% positive. Owner est. 4.6M–5.8M.

Fall Guys

Mediatonic / Epic · 2020

MECHANIC

Short race and survival rounds in a playlist.

MULTIPLAYER

Online, cross-platform only.

FINANCIALS

Free-to-play. Legacy Steam peak 172,213. Metacritic 80.

Pummel Party

Rebuilt Games · 2018

MECHANIC

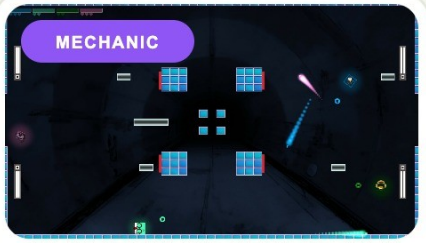

Board game with short competitive mini-games.

MULTIPLAYER

4–8 online and local. No LAN listed.

FINANCIALS

$14.99. Peak 20,957. Owner est. 1.5M–7.6M.

Squarena

Codeaclysm · 2022

MECHANIC

Minimal 2D arena shooter: low health shrinks you; small bodies feel more recoil.

MULTIPLAYER

Up to 6 local. No LAN listed.

FINANCIALS

$4.99. Sales not disclosed.

Screenshots: official Steam media, © publishers. “Owner est.” = third-party estimates via SteamDB, not sales. 17 Oct 2026 [7].

03 · MARKET

Where we sit among them

	PARTY ANIMALS	GANG BEASTS	FALL GUYS	PUMMEL PARTY	SQUARENA	SHOOTER PARTY
3D characters	✓	✓	✓	✓	○	✓
Ranged attacks	–	○	○	–	✓	✓
Hits weaken your body	○	○	○	○	✓	✓
Less mass, further knockback	○	○	○	○	○	✓
Several mini-games, one result	○	○	–	✓	○	✓
Official LAN play	○	○	○	○	○	✓
Plays with no internet	○	✓	○	✓	✓	✓

✓ Yes – Partly ○ No ✓ Planned (Shooter Party)

“Official LAN: No” = not advertised in the game's Steam features. “Partly”: Party Animals and Pummel Party have some weapons or items; Fall Guys' playlist eliminates rather than scores. Squarena weakens you by shrinking your size; we lower mass instead. Party Animals needs internet even on one screen [8].

04 · INNOVATION

Innovation & creativity

No shipped game we found ties knockback to the mass you have lost.

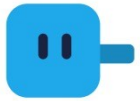

01

Mass, not size

Hits lower your mass while your size stays. The same shot launches a weakened player further, and everyone can see the danger build.

02

One trigger, many effects

The same shot pushes, damages or lifts you, depending on the mini-game. Controls are learned once; each mini-game feels new.

03

Your session, your rules

Random or custom playlists, excluded or repeated mini-games, and an end by rounds or score. All on a LAN, no internet.

Most party games pick one: a playlist of unrelated mini-games, or one physics brawler. **Shooter Party keeps one character and one shot across the whole session, and lets each mini-game bend what that shot means.**

04 · INNOVATION

Closest prior art

What exists already, and what we did not find.

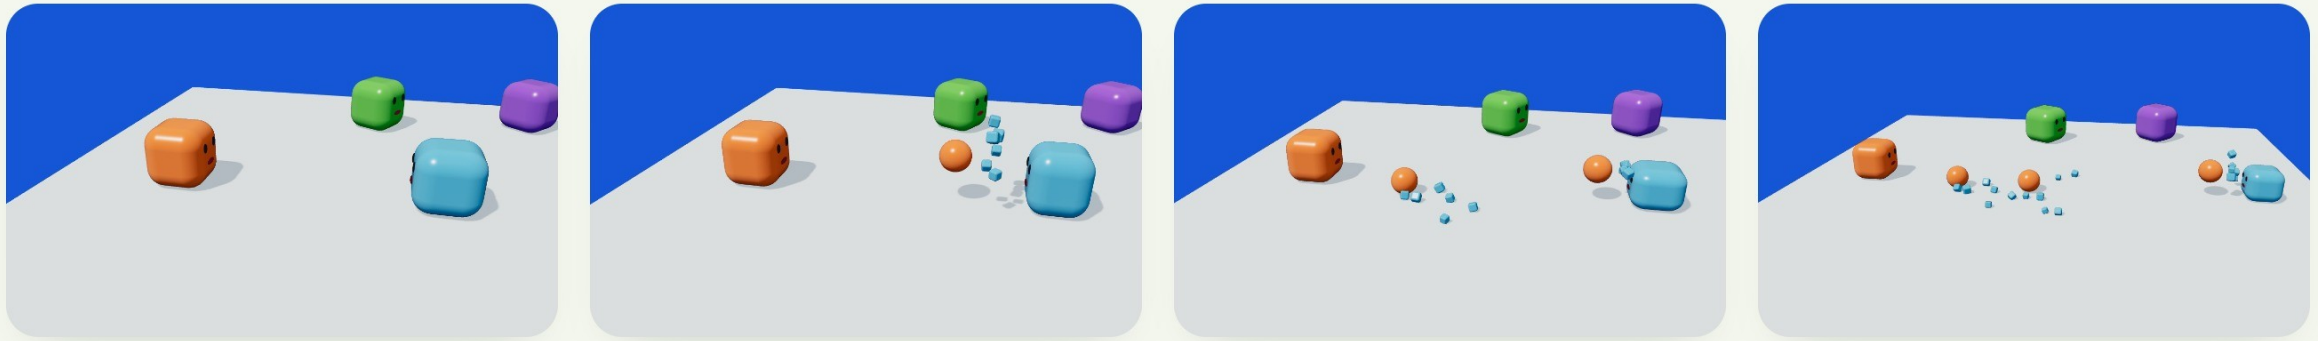

IDEA	CLOSEST PRIOR ART	STATUS
Hits weaken your body	Squarena (2D): lower health, smaller body. Morphies Law: hits move mass between robots.	PRECEDENT
Lighter, launched further	Smash Bros. raises knockback with a damage % counter, not mass. In Squarena, smaller bodies feel more of their own recoil.	NOT FOUND
Blast to climb	Rocket jumping in classic shooters such as Quake and Team Fortress 2.	PRECEDENT
Shoot to steer on ice	Recoil movement exists in some games; we did not search this one yet.	TO CHECK
Mass knockback in a LAN party game	No shipped game found.	NOT FOUND

Prior-art search of shipped games, Oct 2026 [9–10]. “Not found” means not found after searching.

05 · DRAFTS & PROTOTYPES

Physics prototype

Does knockback read on screen?

Before · Shot 1 · Shot 2 · Shot 3

WHAT WE BUILT AND SAW

A deterministic physics test in Three.js. Over three shots the target flies further each time, and the rule is readable without any UI.

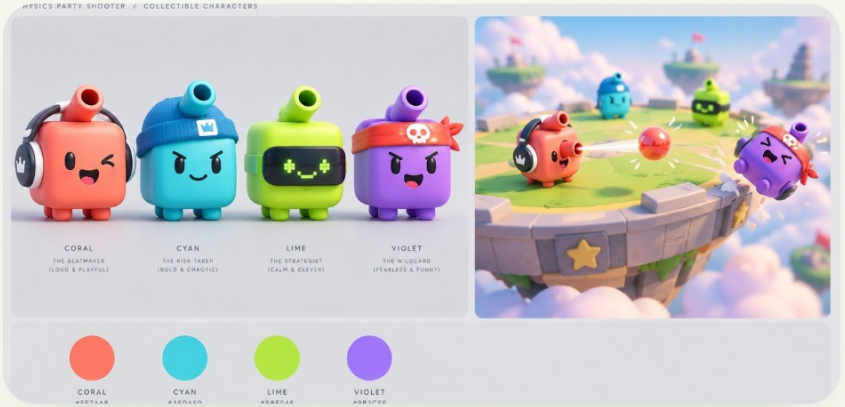

WHAT CHANGED SINCE

This early test showed lost mass as shrinking. Our rule now keeps the size and lowers only the mass, so the Unity test needs another way to show it: a HUD bar, a colour or an effect, to be chosen.

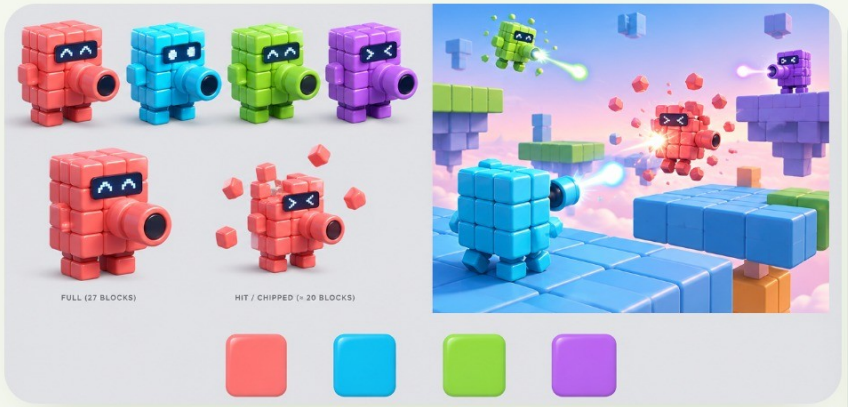

05 · DRAFTS & PROTOTYPES

Art direction: glossy toy

Four looks compared before modelling; the glossy toy was chosen.

A Vinyl toy

B Building blocks

C Glossy toy · chosen

D Jelly

CHOSEN

C, glossy toy. Every concept render in this deck uses it.

SETTINGS

Arenas take bright party settings, such as grass, sky and water. Ice is the theme of one mini-game, not the whole game.

PLAYER COLOURS

Orange · Cyan · Lime · Purple

All AI-generated drafts. None is gameplay.

05 · DRAFTS & PROTOTYPES

Logo drafts

Three uses of one mark. The name is a working title.

DRAFT A · WORDMARK

Title screen, deck cover, video end card.

DRAFT B · STACKED

Square formats: store capsule, lobby screen.

DRAFT C · ICON

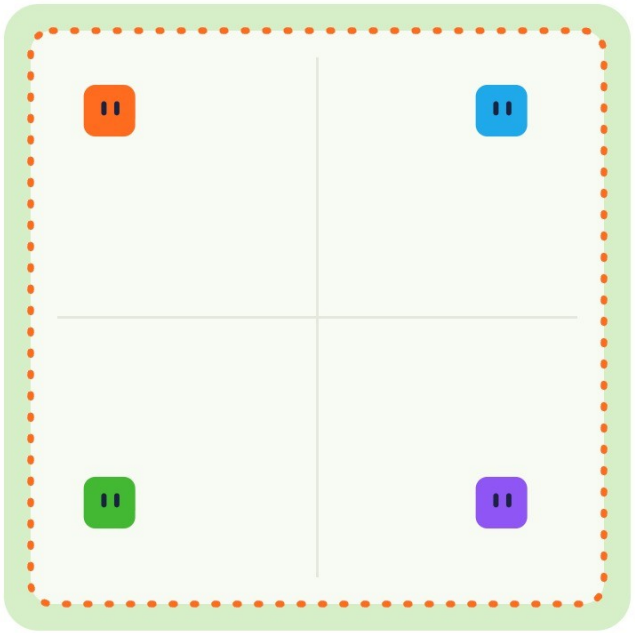

Taskbar, build icon, favicon.

05 · DRAFTS & PROTOTYPES

Level drafts, top-down

Knockback Arena and Ice Loop. Blast Parkour and Hole Grab come next, as blockouts in Unity.

KNOCKBACK ARENA · ARENA DRAFT

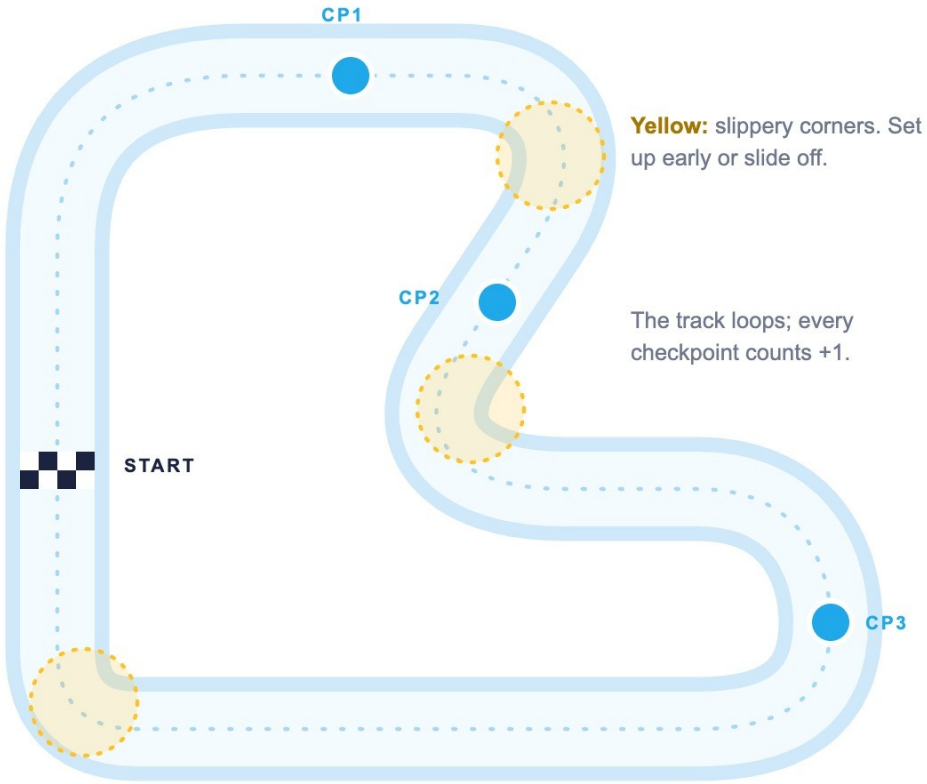

Fall zone. No walls, no cover.

One flat square platform.

Spawn near corners.

OPEN EDGE = KNOCKOUT LINE

ICE LOOP · TRACK DRAFT

Yellow: slippery corners. Set up early or slide off.

The track loops; every checkpoint counts +1.

Draft layouts. Dimensions, spawn points and checkpoint count are not set.

06 · DEVELOPMENT PLAN

Development plan

12 weeks, four presentations, one playable step each.

Proposed MVP: the shared core plus three mini-games (Knockback Arena, Ice Loop, Hole Grab). Blast Parkour joins in the final phase if time allows; the ideas in progress come after the term. Course checkpoints are on Mondays.

19 Oct — DONE

Proposal

Concept, research, physics prototype and this pitch.

16 Nov

Demo 1

Shared core, LAN host/join and a playable Knockback Arena.

14 Dec

Demo 2

Ice Loop and Hole Grab. A full session with playlist and scoreboard.

11 Jan

Final

Blast Parkour if time allows. Tuning, polish, promo video.

RISK 01 Networked physics

Clients disagree on a push or a fall.

Plan: The host simulates; clients only render and interpolate.

RISK 02 Balance

Hits too easy, or mass loss snowballing.

Plan: Fire-rate limits; gravity shots if needed.

RISK 03 Scope

More mini-game ideas than one term allows.

Plan: The core first; mini-games in priority order; extras only once the MVP is fun.

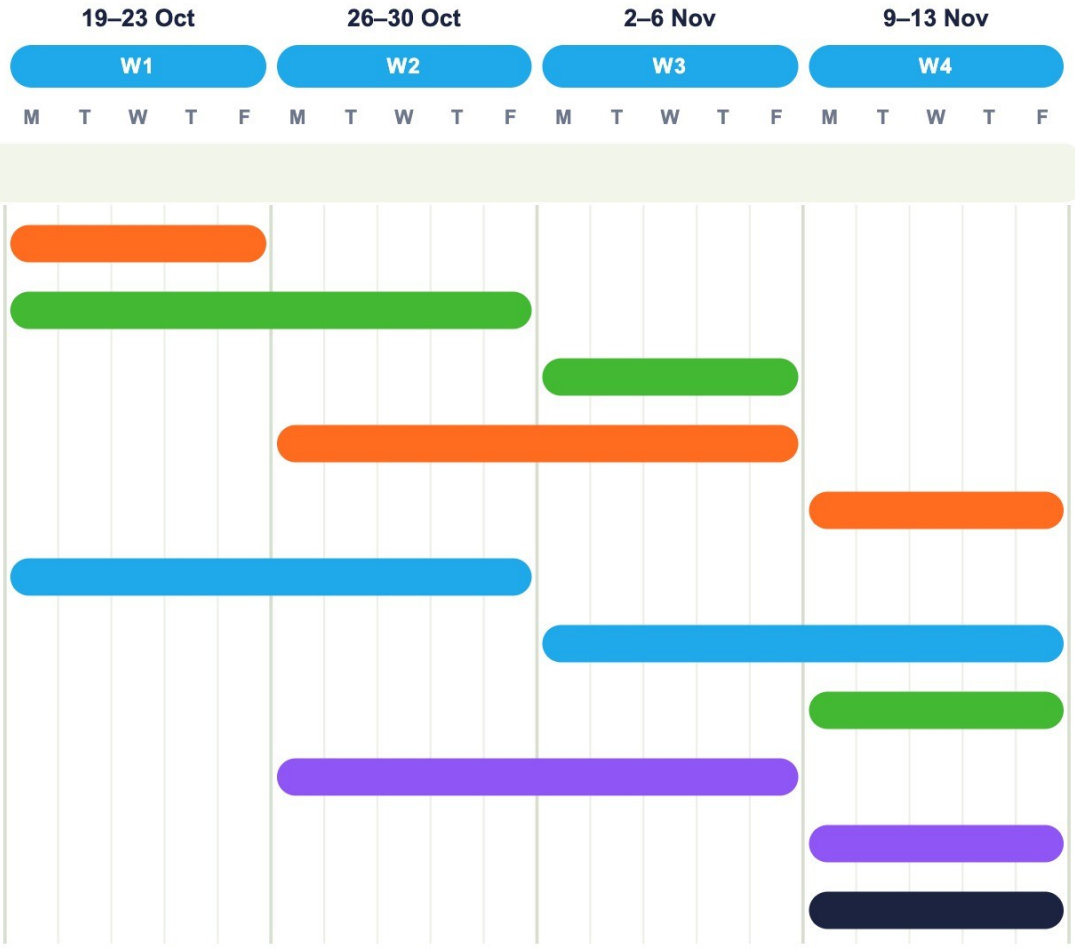

PROPOSED OWNERS

- **Ezel** — Network, build
- **Abdurrahim** — Shots, mini-game rules
- **Kürşat** — Movement, levels
- **Ardıl** — Art, UI, session
- **Team** — Shared tasks

3.6	LAN stress test & final build	Ezel	1 wk
3.7	Promo video & final deck	Team	1 wk

PROPOSED OWNERS

- **Ezel** — Network, build
- **Abdurrahim** — Shots, mini-game rules
- **Kürşat** — Movement, levels
- **Ardıl** — Art, UI, session
- **Team** — Shared tasks

FINAL STANDINGS

Shooter Party in short

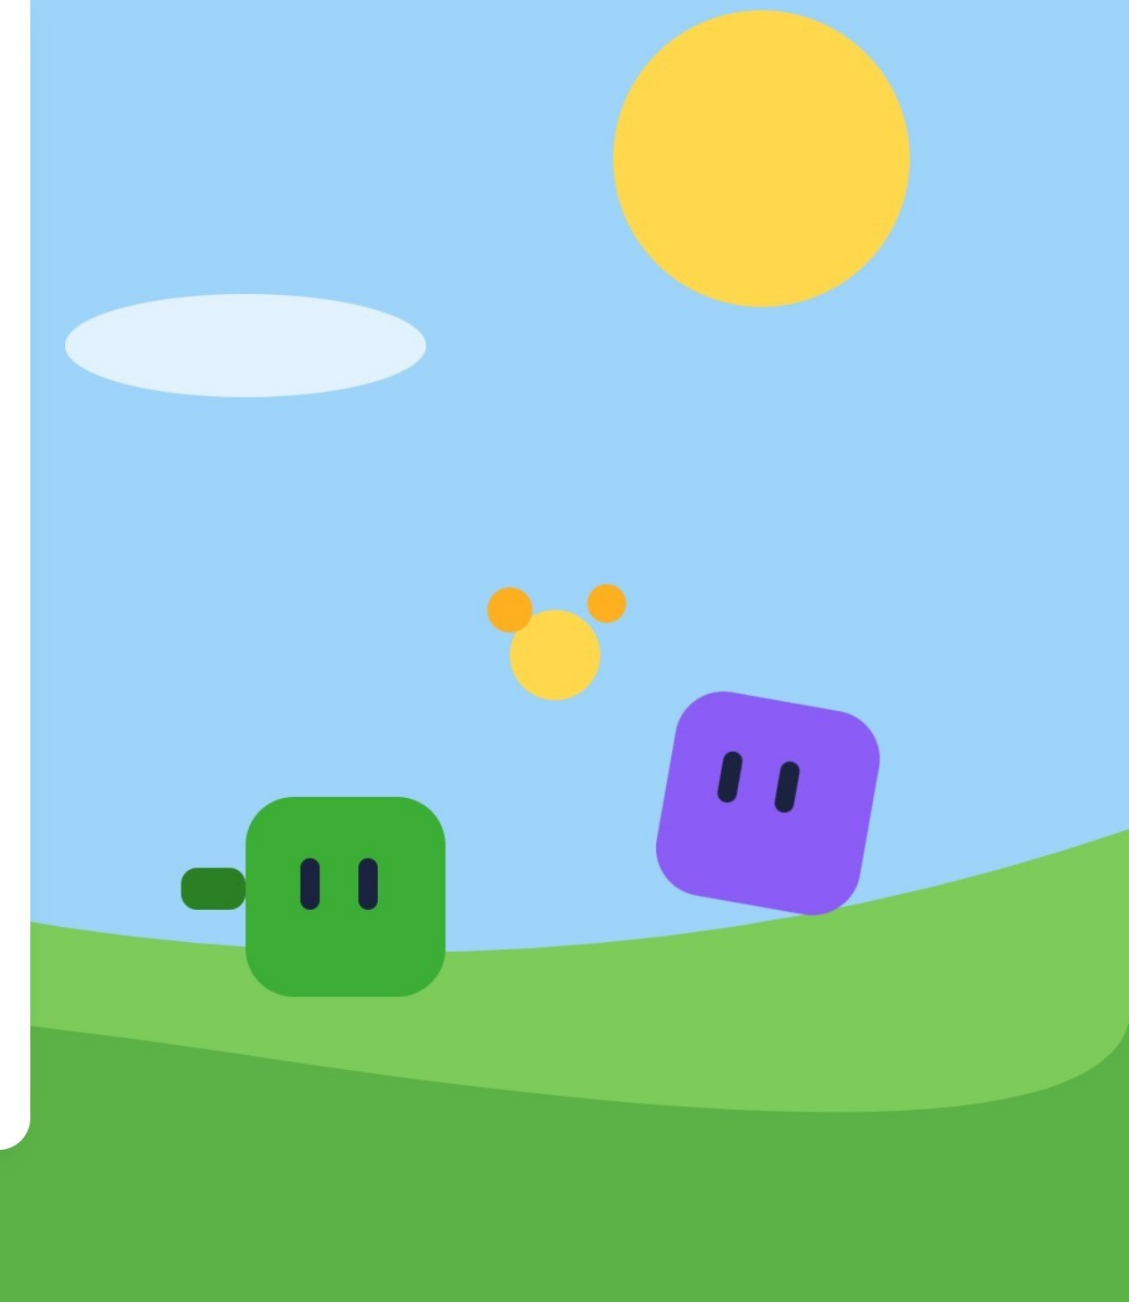

1st 2–4 players, one LAN, no internet, your own playlist.

2nd One shooting cube; every mini-game changes what a shot does.

3rd Every hit lowers your mass, so the next push sends you further.

Questions?

Ezel Bayraktar · Abdurrahim Özağaç · Kürşat Hürkan Aydın · Ardıl Bilal Ülkü
