

WRITTEN PITCH · PROJECT INTRODUCTION

Shooter Party

WORKING TITLE

October 2026

A multiplayer party game: one shooting cube, many mini-games, and a shot that does something new in each one.

01 · THE GAME

Game Description

A session is a run of mini-games, and placement turns into points.

Shooter Party is a multiplayer party game. Each player plays on their own device: one hosts the session and the others join over the network. Everyone controls a small shooting cube in their own colour. The mini-games change what a shot does: one pushes, one damages, one lifts you with a blast. When the session ends, the player with the most points wins.

How a session runs

1. **Lobby** — Host sets the session rules. Others join over the network.
2. **Pick** — The playlist picks the next mini-game. Everyone loads the same arena.
3. **Play** — Some mini-games have their own rounds inside.
4. **Place** — Final placement becomes points.
5. **Standings** — Scoreboard updates; the leader wears the crown.

SESSION SETTINGS

End condition: after a set number of mini-games, or when a player reaches a target score.

Playlist: random or custom. Unwanted mini-games can be excluded, and one mini-game can be played many times.

Inner rounds: a mini-game can run its own rounds, like Hole Grab losing one hole each round.

PLACEMENT POINTS · PROPOSED

1st	4 pts
2nd	3 pts
3rd	2 pts
4th	1 pt

Shown for four players; the scale grows with the player count.

COMEBACK RULES: AN EDGE FOR WHOEVER IS BEHIND

+1 comeback point
The player in last place overall earns one bonus point after each mini-game.

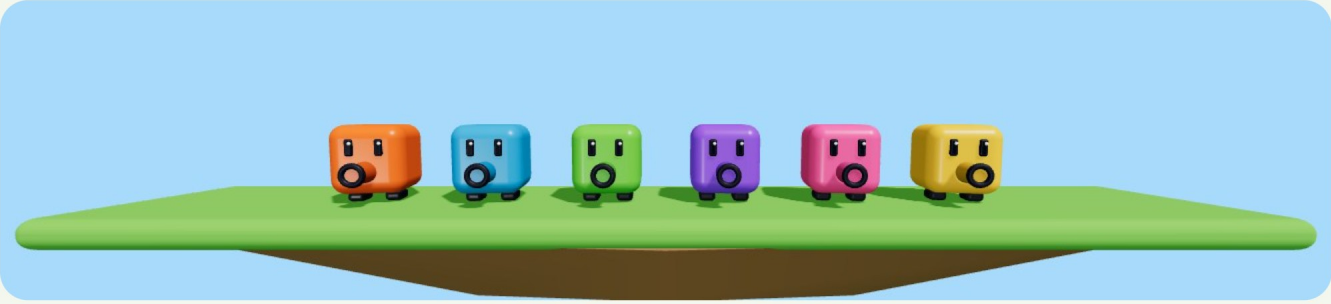

Ties go to the underdog
On equal points, the player who was further behind ranks higher.

A crown on the leader
Everyone can see who to catch, so the leader becomes the target.

02 · GAMEPLAY MECHANICS

Core Mechanics

One shooting cube. Every mini-game changes what a shot does.

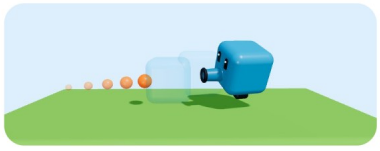

The player. A small character whose barrel fires real projectiles: physics objects, not instant hits. It does not have to be a cube, but its proportions stay close to 1:1:1. Every player gets a different colour.

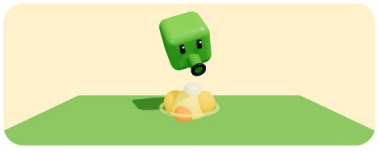

One trigger, three effects

Damage
The shot lowers the target's health.

Knockback
The target is pushed away from where the shot came from.

Blast
The shot explodes. Fired at the ground, it lifts you up.

WHAT THE SHOT DOES IN EACH MINI-GAME

Knockback Arena	Knockback, and every hit lowers the target's mass.
Blast Parkour	Blast: lifts you, pushes rivals off ledges; hold for a strong one.
Ice Loop	Knockback and momentum: push rivals, steer yourself with recoil.
Hole Grab	Knockback: push rivals away from the holes.
Battle	Damage: shots lower health, last cube standing wins.

MOVEMENT

WASD to move. Jumping only where a mini-game allows it. **Shift** to dash, on a cooldown or as charges from a power-up.

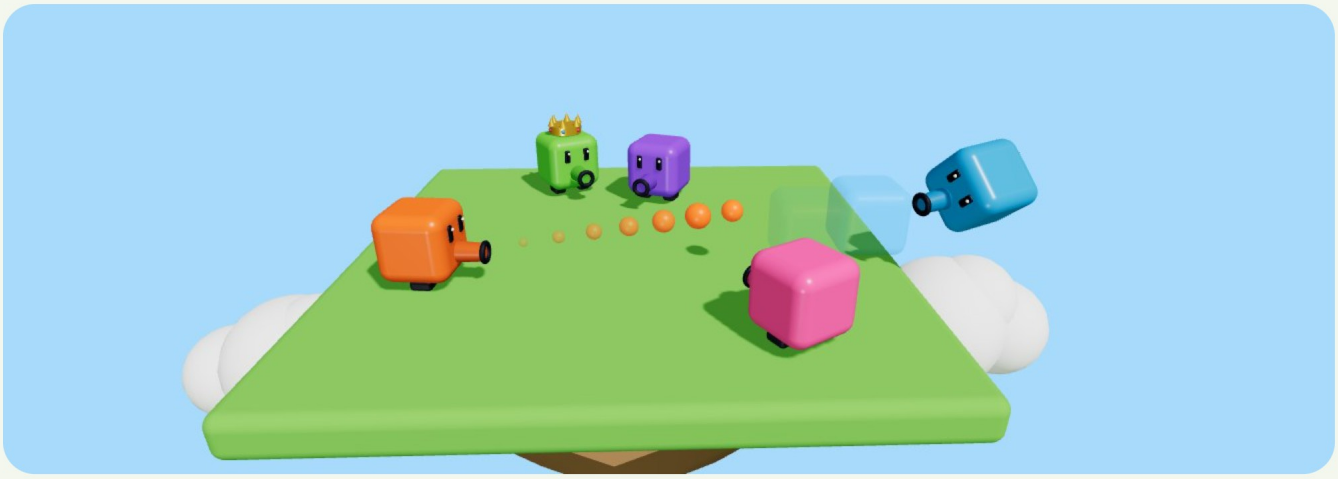

CAMERA

A third-person shooter camera in a 3D world, since aiming is the heart of the game. A mini-game can adjust it where it needs to.

MINI-GAME 01 · WORKING NAME

Knockback Arena

Shoot the others off a flat floor. Every hit makes them lighter.

3D concept render, not gameplay. Arena theme and size are not set.

MASS, NOT SIZE: THE SAME SHOT, A LONGER FLIGHT

Full mass. A hit pushes a little.

After a few hits. Same size, less mass, a longer push.

Many hits. One more shot sends it off the edge.

SHOOTING

Free, with a fire-rate limit. Shots are real thrown objects and have no effect on the shooter.

GETTING HIT

A force from the shot's direction, and a drop in mass. The size stays the same.

POWER-UPS

Jump: strong, so it is a pickup; a lighter cube jumps higher. **Dash:** Shift, e.g. 3 charges.

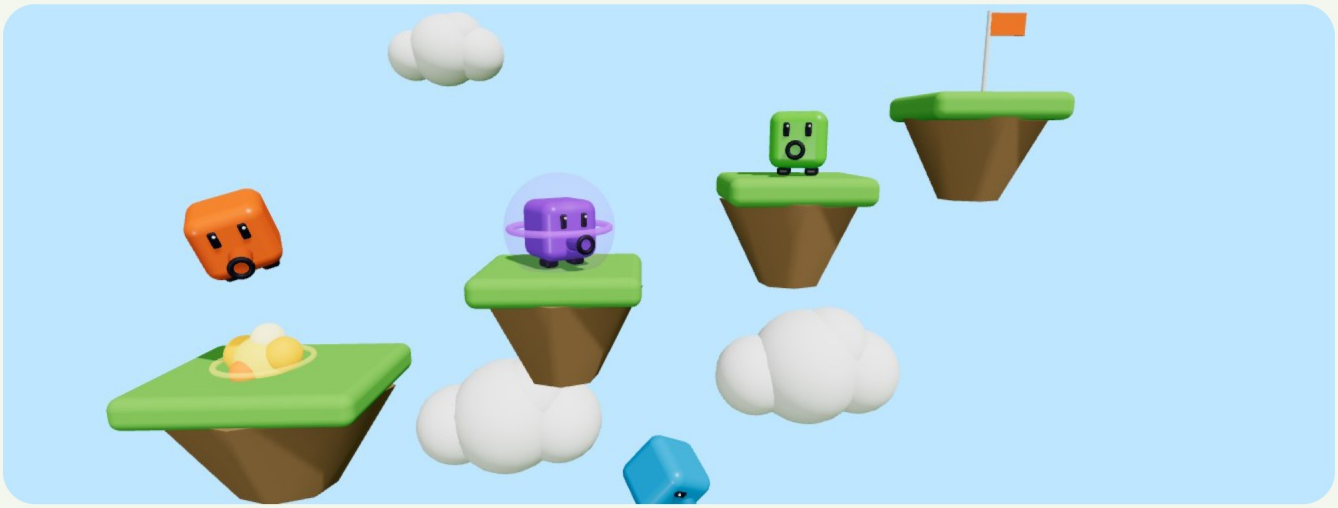

OUT AND PLACEMENT

Falling off means you are out. Placement by order of elimination; the last cube standing wins.

MINI-GAME 02 · WORKING NAME

Blast Parkour

An obstacle course in the sky: shoot, blast and climb while knocking the others into the void.

3D concept render, not gameplay. Orange blasts the ground to jump; purple charges a strong shot; cyan has been knocked into the void.

NOWHERE TO HIDE

Open islands with no walls or cover. Everyone is always in someone's line of fire.

CHARGED BLAST

Hold to fire a strong explosion. While charging you cannot move, so you are open to attack.

BLAST TO CLIMB

A shot at the ground lifts you up. The same blast can push a nearby rival off a ledge.

FALL = OUT

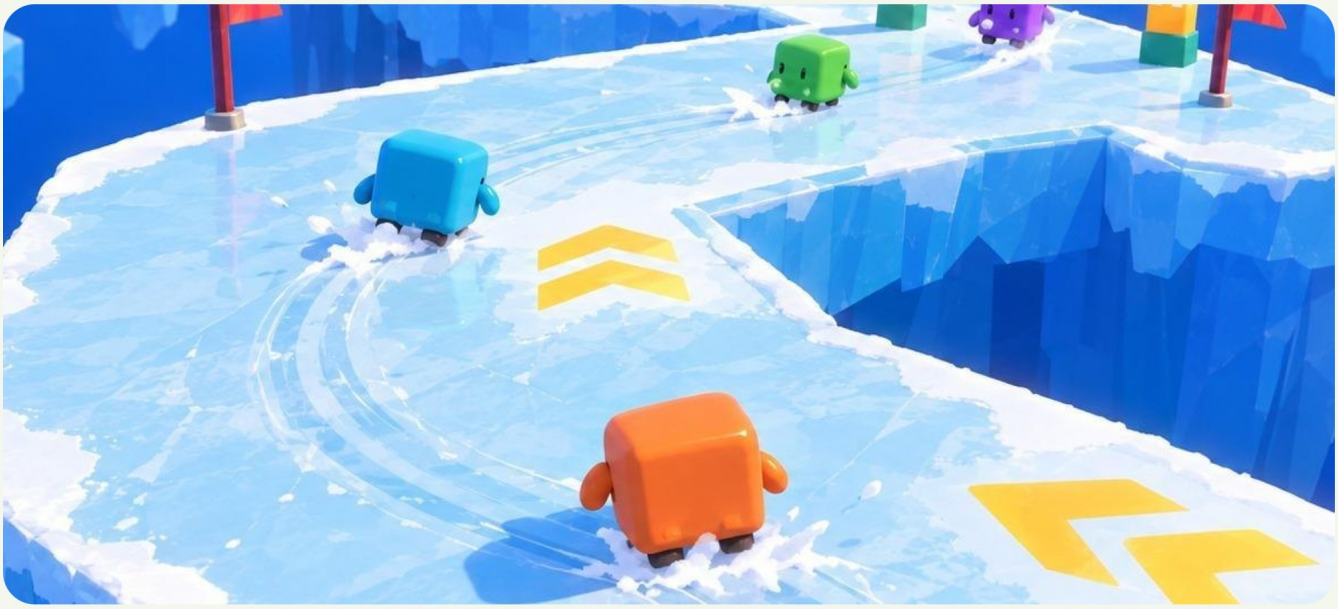

Whoever drops below the course is out. First to the top flag wins; the rest are ranked by height reached.

If hitting is too easy: we make shots fall with gravity, so players have to read the arc to land a hit. We decide this in playtests.

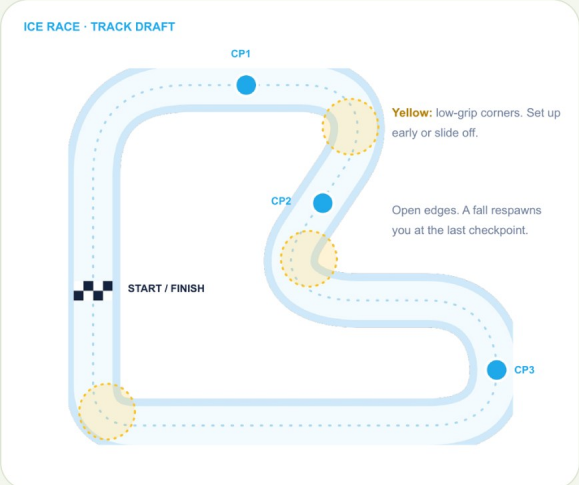

MINI-GAME 03 · WORKING NAME

Ice Loop

Most checkpoints before the timer runs out wins. The ice does not help.

Concept render, not gameplay. Ice is the theme of this one mini-game only.

Track draft, top-down. Checkpoint count and length are not set.

LOOPED TRACK

When the track ends it starts again, and every checkpoint you pass counts +1. The count, not the lap, decides the placement.

PUSH TO WIN

The ice is slippery. Push rivals off it into the water and they restart from their last checkpoint.

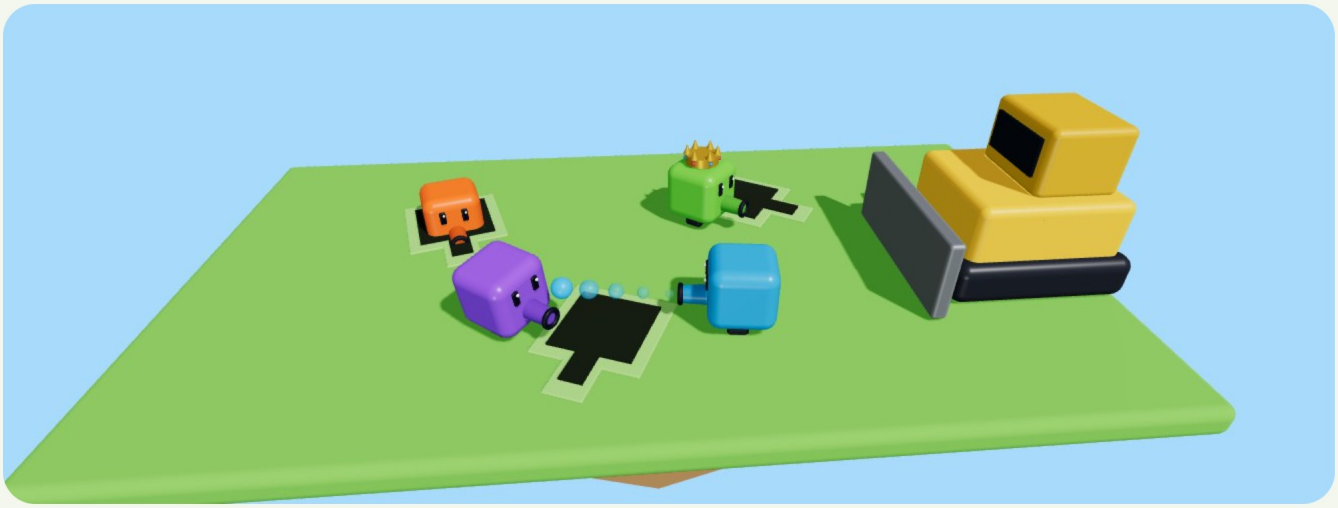

STEER WITH RECOIL

Firing forward while sliding pushes you back, so a shot can also correct your line.

MINI-GAME 04 · WORKING NAME

Hole Grab

Musical chairs with holes. No hole, and the bulldozer gets you.

3D concept render, not gameplay. Each hole has the player's shape and a fixed barrel slot. Orange is already in a hole; the bulldozer moves in from the right.

ROUNDS INSIDE THE MINI-GAME (EXAMPLE WITH 4 PLAYERS)

Round 1
4 players, 3 holes. One is crushed.

Round 2
3 players, 2 holes. One is crushed.

Round 3
2 players, 1 hole. The one inside wins.

With more players there are more holes; each round always has one hole fewer than players.

PLAYER-SHAPED HOLES

Holes open in the ground in the player's shape, with the barrel's angle marked. You have to line up to drop in.

SHOOT TO PUSH

Shots push other players away from the holes. A player already inside a hole cannot be pushed out.

02 · GAMEPLAY

More Mini-games & Concept Ideas

Same cube, same shot, new maps and rules. The playlist is built to grow.

More mini-games

Battle

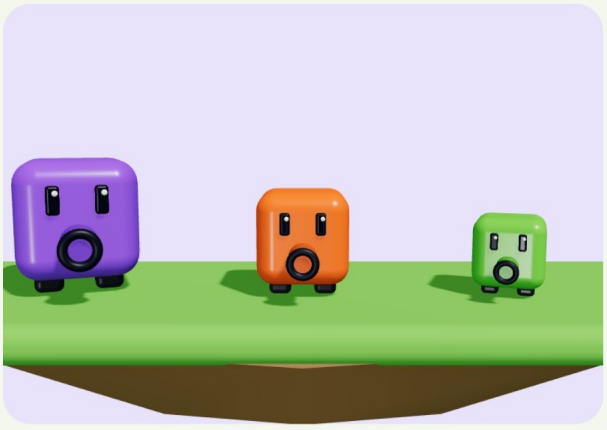

A straight shoot-out between all players. Here the shot does damage: hits lower health and the last cube standing wins. A harder setting can raise the damage or remove power-ups.

The Monster

One player becomes the monster for a round and everyone else plays against them. The role moves on each round, so everyone gets a turn.

Concept ideas we may add

Not part of the plan yet; candidates once the core game is fun.

Character types

Players pick a type with its own strengths. Since knockback depends on mass, weight is the natural first difference.

Heavy	MASS ●●●	SPEED ●○○
Balanced	MASS ●●○	SPEED ●●○
Light	MASS ●○○	SPEED ●●●

Rage meter

A meter that builds up across mini-games. Once it fills over a few rounds, the player can spend it in a later mini-game.

02 · GAMEPLAY · COSMETICS

Character Customisation

Make the cube yours. Cosmetics change the look, never the game.

3D concept render of the shop: top hat and moustache, glasses and hair, headphones, bow, cap.

Cosmetic slots

Head	Face	Ears	Extras
Hats, caps, hair styles	Glasses, moustaches	Headphones, earrings	Bows, badges, trails

THE SHOP

An in-game shop where players browse cosmetics, try them on in the lobby and dress their cube before a session.

PURELY COSMETIC

Nothing in the shop changes mass, speed or the shot. Every player stays on equal terms.

ALWAYS READABLE

Cosmetics never cover the barrel or the eyes, so where a player is aiming stays clear in every fight.

THE CROWN STAYS SPECIAL

The crown is not for sale: only the current session leader wears it, so everyone knows who to catch.

02 · GAMEPLAY & TECH

Technical Design

One shared core; every mini-game plugs into it.

MINI-GAMES	Knockback Arena	Blast Parkour	Ice Loop	Hole Grab	Battle, more
CONTRACT	`Setup(players, settings) → Run() → Results() : placement`				
SHARED GAMEPLAY	**Cube controller** WASD, jump, dash	**TPS camera** per-game tweaks	**Shot system** effect set per game		
	Session & playlist end rules, exclusions	**Scoreboard** points, comeback, crown	**Menus, UI, shop** join, settings, cosmetics		
NETWORK	One player hosts, the others join as clients · Unity Netcode (candidate) · online servers later				
ENGINE	Unity · 3D · built-in rigidbody physics				

How each shot is built in Unity

PART	WHAT THE PLAYER SEES	HOW WE BUILD IT
Every shot	A ball leaves the barrel and hits something.	Pooled projectile with a `Rigidbody`; on `OnCollisionEnter` it calls the mini-game's `IShotEffect.Apply(target, hit)`.
Knockback Arena	Each hit sends you further. Fall off and you are out.	`AddForce(dir * k, Impulse)`; each hit lowers `rb.mass`, size stays. A trigger below the platform marks "out".
Blast Parkour	Shoot the ground to jump; hold to charge.	`OverlapSphere` + `AddExplosionForce` at the impact; the shooter is included. Hold time scales radius and force.
Ice Loop	You slide; shooting pushes you back.	Track `PhysicMaterial` with near-zero friction; recoil is an opposite impulse on the shooter. Checkpoints are triggers, +1 each.
Hole Grab	Get into a hole; push others out of reach.	Holes are cube-shaped triggers, first to enter claims it. Shots use a small impulse, no damage.
Online	Every screen shows the same result.	Clients send input by `ServerRpc`; the host runs physics and syncs with `NetworkTransform` / `NetworkRigidbody`.

One shot over the network: client sends fire and aim → host spawns the shot, runs physics and applies this game's effect → every client gets the same snapshot and interpolates. Your own movement is predicted locally, so it feels instant; anything that decides a result runs on the host. **Main risk:** smooth physics on every client. We tune the snapshot rate and test online from Demo 1.

03 · MARKET

Market Potential & Target Audience

People play to play together, and party games keep selling for years.

Our audience is groups of friends who want short, chaotic rounds together, online or in the same room, and the streamers and viewers who enjoy watching party-game chaos.

$197B
Global games market in 2025, up 7.5% year on year.
Newzoo [1]

$43.6B
PC games revenue in 2025, up 12% year on year.
Newzoo [2]

70%
of US players aged 8+ play games with other people.
ESA 2026 [3]

$4.1B
Steam revenue of co-op games in H1 2025, a record (estimate).
Alinea [4]

PARTY GAME	FIGURE	WHAT IT SHOWS
Super Mario Party (2018)	21M+ sold	Mini-game party games are a mass-market genre. [5]
Super Mario Party Jamboree	5.6M+ in 11 wks	The genre is still growing: the series' fastest seller. [5]
Stick Fight: The Game	≈4.75M	A small studio's physics shooter can reach millions (Steam estimate). [6]
Pummel Party	2–5M owners	Mini-games and friends, sold for years after launch (estimate). [7]
Party Animals	135,834 peak	Players in its free playtest; 113,000+ Twitch viewers watched. [8]
Feather Party	87% positive	Of 551 Steam reviews; 22 mini-games for up to 8 players. [9]

RISK, STATED PLAINLY

Steam is crowded: an estimated 65.9% of 2025 releases earned under $1,000 [10]. A party game needs a hook people can explain in one sentence. Ours: **one shot that means something new in every mini-game.**

03 · MARKET

Competitors

Five games compared by look, theme, mechanic and money.

GAME	VISUAL STYLE	THEME	MECHANIC · PLAYERS	FINANCIALS
Party Animals Recreate Games · 2023	Soft, furry 3D cartoon animals	Cute animals brawling in arenas	Physics brawling: grab, punch, throw out. Online, same-screen.	Launch peak 104,174. Owner est. 2.5M–6.0M.
Gang Beasts Boneloaf · 2017	Wobbly jelly-like ragdolls, pastel	Wrestling on dangerous city stages	Ragdoll brawling into hazards. Same-screen, online.	85% positive. Owner est. 4.6M–5.8M.
Fall Guys Mediatonic / Epic · 2020	Candy-coloured jellybeans	TV game-show obstacle course	Race and survival rounds, players eliminated. Online.	Free-to-play. Legacy peak 172,213. Metacritic 80.
Pummel Party Rebuilt Games · 2018	Low-poly 3D cartoon	Friendship-ruining board game	Board game plus short mini-games. 4–8, online and local.	$14.99. Peak 20,957. Owner est. 1.5M–7.6M.
Feather Party threeW · 2026	Colourful 3D, chick characters	A planet of chicks, Lobby Island hub	Board mode plus 22 mini-games; elemental physics. Up to 8, online.	$8.99. 87% positive of 551 reviews.
Shooter Party our team · 2026	Glossy toy cubes, each with a barrel	Bright party islands: grass, sky, water, ice	One shot whose effect changes per mini-game. Multiplayer, online.	Student project, free build. A store price is a later decision.

Where we sit among them

	PARTY ANIMALS	GANG BEASTS	FALL GUYS	PUMMEL PARTY	FEATHER PARTY	SHOOTER PARTY
3D characters	●	●	●	●	●	●
Several mini-games, one result	○	○	◐	●	●	●
Cosmetic customisation	●	●	●	●	●	●
One shot, new effect per mini-game	○	○	○	○	○	●

● Yes ◐ Partly ○ No ● Planned (Shooter Party)

"Partly": Fall Guys' playlist eliminates players rather than scoring each round. Feather Party changes physics with elemental effects; it has no shared shot. Owner estimates are third-party (SteamDB), not sales [11]; Feather Party from its Steam page [9]. Visual style and theme from each game's store page.

04 · INNOVATION

Innovation & Creativity

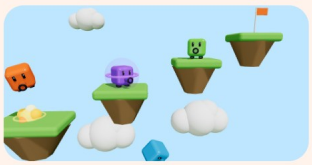

One shot that changes its meaning in every mini-game.

THE BIG IDEA **One trigger, many effects**

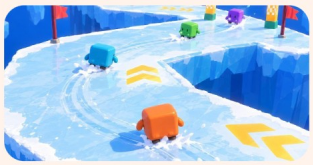

The same button, the same barrel, the same aim. Only what the shot does changes, so controls are learned once and every mini-game still feels new.

Push · Knockback Arena

Lift · Blast Parkour

Steer · Ice Loop

Clear the way · Hole Grab

Different ideas that back it up

Beyond the shot: variety, comeback and your own session.

01

Mini-game variety

Different maps and themes, the same mechanic: every round feels new, but your skill carries over.

Arena · Sky islands · Ice track · Holes

02

Comeback built in

Last place earns +1, ties go to the underdog, and the leader wears a crown everyone aims at.

+1 for last · Ties: underdog · Crown: leader

03

Your session

Custom playlists, repeats and exclusions, and an end by game count or target score.

Random · Custom · Repeat · Exclude · Target score

How we differ

Three points, against the closest games in the genre.

THE CLOSEST GAMES		SHOOTER PARTY
One shared shot	Pummel Party and Feather Party give each mini-game its own controls and goal; Feather Party varies physics with elemental effects.	**One shot stays the shared action in every mini-game.**
Comeback rules	Racing and party games often help the trailing player with random items: a luck-based catch-up.	**A fixed, visible rule: +1 point and the tie-break.**
Custom sessions	Many party games let players pick mini-games.	**We add an end by score or count, and favourites that can repeat.**

05 · DRAFTS & PROTOTYPE

Drafts: Look & Logo

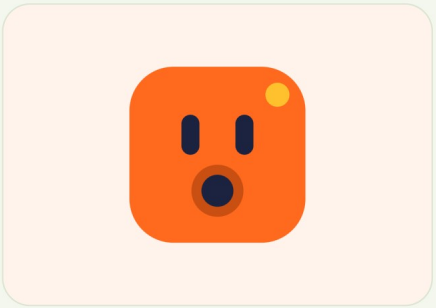

Logo drafts

A · Cube letters. Title screen, cover, video end card.

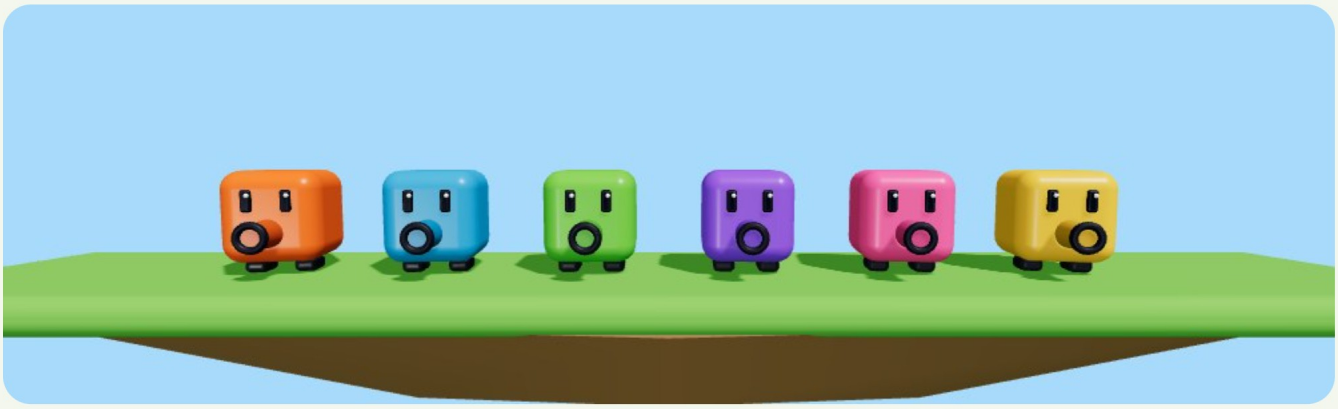

B · Stacked. Store capsule, lobby screen.

C · Icon. Taskbar, build icon, favicon.

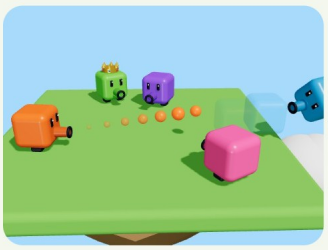

Three directions for the same identity: coloured cube tiles and the orange cube with its barrel. We pick one after feedback; the colours match the character palette below.

Art direction: glossy toy

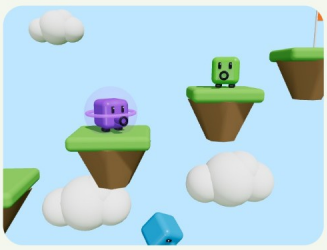

Rounded cubes in bright colours, a barrel on every character, and party settings such as grass, sky and water. Ice appears in Ice Loop only.

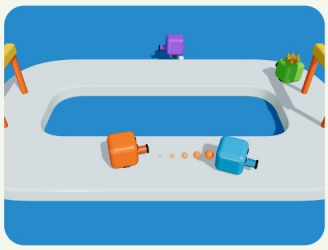

3D blockout scenes

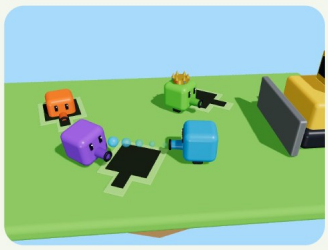

Knockback Arena

Blast Parkour

Ice Loop

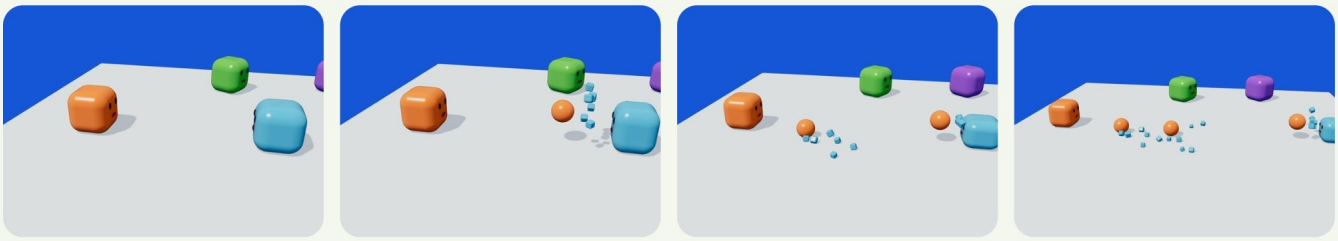

Hole Grab

Each mini-game was blocked out in 3D to check camera angle, scale and how readable the shots are before building it in Unity.

05 · DRAFTS & PROTOTYPE

Prototype & Level Drafts

Early prototype: does knockback read on screen?

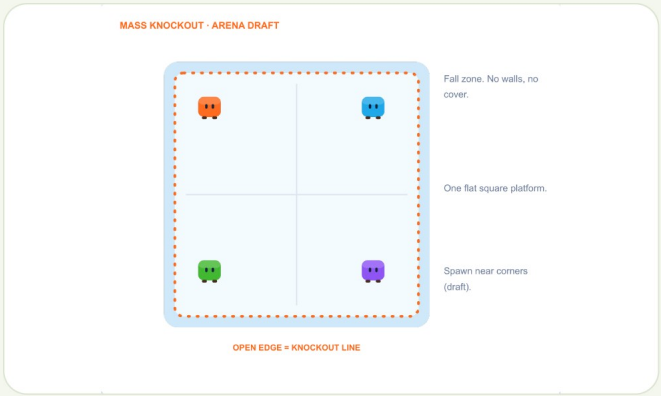

Before | Shot 1 | Shot 2 | Shot 3

WHAT WE BUILT
A small physics test of the knockback rule in Three.js, rendered frame by frame.

WHAT WE SAW
Over three shots the target flies further each time; the rule reads without any UI.

HOW WE USE IT
The reference for the first Unity test of Knockback Arena: same scene, same rule.

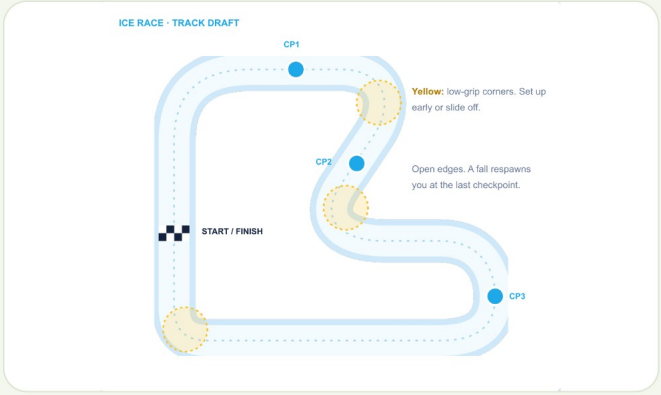

Level drafts

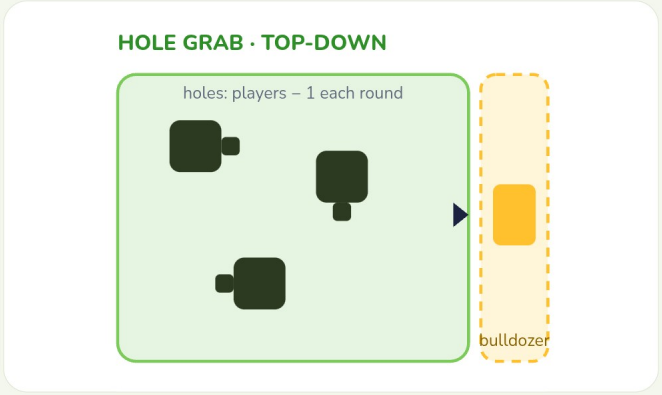

Knockback Arena

Blast Parkour

Ice Loop

Hole Grab

Draft layouts for scope and blockout. Sizes, spawn points and checkpoint counts are not set. 3D blockouts are on the previous page.

06 · DEVELOPMENT PLAN

Development Plan

12 weeks, four presentations, one playable step each.

19 Oct
Proposal
Concept, research, 3D drafts and this pitch.

16 Nov
Demo 1
Core prototype, host and join, first mini-games playable.

14 Dec
Demo 2
All four mini-games and a full session with scoreboard and menus.

11 Jan
Final
UI, sound, cosmetics, polish and the promo video.

Everyone designs a mini-game

Each member designs and builds at least one mini-game, including what the shot does in it (a hit, a jump or momentum), and finds its assets. Each also owns one shared system.

MEMBER	MINI-GAME AND ITS SHOT	SHARED SYSTEM
Abdurrahim	**Knockback Arena**: knockback and mass loss	Core mechanics prototype; scoreboard system
Ardıl	**Blast Parkour**: blast jump and charged shot	Menus; promo video
Kürşat	**Ice Loop**: push and recoil momentum	UI design; sound and music
Ezel	**Hole Grab**: push rivals away from holes	Online system (research and build); sound and music

Mini-game assignments are a proposal; Battle is next in line once the four are fun.

Risks and how we handle them

RISK 01
Networked physics
Players disagree on a push or a fall. **Plan:** the host simulates; clients only render and interpolate.

RISK 02
Balance
Hits too easy, jumping too strong, a runaway leader. **Plan:** fire-rate limits, jump as a power-up, comeback rules.

RISK 03
Scope
Four mini-games by four people. **Plan:** one shared core first, small mini-games, extras only after the core game works.

06 · DEVELOPMENT PLAN

Gantt Chart: 12 Weeks

Everyone designs one mini-game and develops its shot (hit, jump or momentum). Those rows are in **bold**.

WBS	TASK	OWNER	19 Oct – 13 Nov	16 Nov – 11 Dec	14 Dec – 8 Jan
			W1 W2 W3 W4	W5 W6 W7 W8	W9 W10 W11 W12
1	**Demo 1 · 16 Nov**				
1.1	Core mechanics prototype: move, shoot, ...	Abdurrahim			
1.2	Online system research, host and join	Ezel			
1.3	**Design own mini-game and its shot**	Everyone			
1.4	Main menu and lobby flow	Ardıl			
1.5	UI style and HUD drafts	Kürşat			
1.6	**Knockback Arena blockout**	Abdurrahim			
1.7	**Blast Parkour blockout**	Ardıl			
1.8	**Ice Loop blockout**	Kürşat			
1.9	**Hole Grab blockout**	Ezel			
1.10	Demo 1 build and presentation	Team			
2	**Demo 2 · 14 Dec**				
2.1	Scoreboard, points and comeback rules	Abdurrahim			
2.2	Networked shots and state sync	Ezel			
2.3	**Finish own mini-game and its shot**	Everyone			
2.4	Assets for own mini-game	Everyone			
2.5	Session menu: playlist and end rules	Ardıl			
2.6	In-game UI: HUD and scoreboard screens	Kürşat			
2.7	First full-session playtest	Team			
2.8	Demo 2 build and presentation	Team			
3	**Final · 11 Jan**				
3.1	Cosmetics shop and customisation	Kürşat			
3.2	Sound effects and music	Kürşat, Ezel			
3.3	Balance tuning from playtests	Team			
3.4	**Polish own mini-game**	Everyone			
3.5	Battle mini-game (stretch goal)	Abdurrahim			
3.6	Online tests and final build	Ezel			
3.7	Promo video	Ardıl			
3.8	Final deck and hand-in	Team			

Each column is one course week; W1 starts 19 Oct. Bars are coloured by owner: Ezel orange, Abdurrahim blue, Kürşat green, Ardıl purple, Everyone/Team navy.

FINAL STANDINGS

Shooter Party in Short

1st One shooting cube; every mini-game changes what a shot does.

2nd A comeback built in: +1 for last place, ties to the underdog, a crown on the leader.

3rd Multiplayer sessions you shape: your playlist, your end rule, your look.
